

ELEMETAL

FUSION METAL CARD

Perfect for large volume issuance for mass affluent market applications, our Fusion Metal Card is made from a pure stainless steel core with an ultra-thin PVC layer on front and back to support unique designs and full colour branding. Weighing in at 14 grams, it gives a reassuringly heavier feel and cooler touch. At the same time, its dual interface and 'tap on both sides' functionality provide a great user experience.

- Any colour digital print on surface for luxurious look, including 'window to metal' option
- Metal edges
- Laser engraved personalisation/DoD personalisation
- Coloured mag stripe and bleeding edge technology for seamless look
- Contactless on both sides

FEATURES

- Made from pure stainless steel giving heavier feeling, cooler touch
- PVC + metal + PVC (industry leading thin PVC layer on front and back)
